The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/766,034	<b>Applicant(s)</b> NOVACEK ET AL.	
	<b>Examiner</b> ELIZABETH R. MACNEILL	<b>Art Unit</b> 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 May 2007 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 14 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haller (US 4,692,156) in view of Haining (US 4,790,822)

Haller teaches a syringe (Fig 2) with needle hub (42), needle (44), plunger (22), bung (26), with hook means (58/62) that engages a needle cup (60) solely in response to axial movement enabling withdrawal of the needle. Fig 1b. As to claim 18 see ridge (70) Fig 2.

Haller does not teach that his gripping member 58/62 has at least two or comprises five tines. It is not specified in the specification but it appears to the examiner that 62 is annular with a barb to snap on to the needle cup 60.

Haining teaches a retractable needle with a snap locking ring 110 separated into pieces to allow the ring to be slightly resilient. This allows the ring to flex and engage a corresponding annulus 109. Fig 2.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the gripping ring of Haller into at least two or five separate sections in order to make the gripping means more flexible and easier to slide over onto the needle cap. It was been held that modifying a device ready for improvement in a known way is within the skill of an ordinary worker in the art.

#### ***Response to Arguments***

4. Applicant's arguments with respect to claims 14 and 16-18 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
